For Vice-Chair/Chair-Elect:

- Riccardo Ferrante

Riccardo Ferrante, Information Technology Archivist and director of the Smithsonian Institution Archives’ Electronic Records Program, oversees the archives’ digital preservation, digitization and electronic records management activities. His work has focused on born digital objects and digital curation, including websites and email. Research projects include: DCAPE (active) and the Collaborative Electronic Records Project (2004-2008) that developed a solution for preserving email accounts. Ricc supports the development and refining of best practices and standards as a means of moving the profession forward. He is currently participating in three efforts: Repository Audit and Certification recently submitted to ISO and CCSDS, and the Federal Agencies Digitization Guidelines sub-groups for Technical Metadata and Video. He has worked with libraries to develop, enhance, and implement library information systems (1994-2003). He is a member of the Society of American Archivists.

- Kelly Eubank

Kelly Eubank is the Electronic Records Archivist with the North Carolina State Archives and Records. Since 2001, she has seen the transformation of state government from a paper based organization to one that uses technology to conducts its business, thus producing electronic records. During her employment, the State Archives and State Library have collaborated to launch a web site archiving program as well as participating in several grants thus establishing the framework for a digital repository. Currently, she is project manager for the Email Collaboration Initiative, a federally funded grant that involves the participation of staff from Kentucky and Pennsylvania. The goal of the project is to create an e-mail collection and preservation tool using an XML schema as the preservation copy of the data. The collection piece uses the standard Internet Mapping Access Protocol to transfer data to the archive. She is also co-lead with the Center for Geographic Information and Analysis on a Library of Congress grant through their National Digital Information Infrastructure Preservation Program to collect and preserve geospatial information. She received her undergraduate degree in history from UNC Chapel Hill and a Masters degree from North Carolina State University in Public History.
For Steering Committee Member:

- **Rachel Donahue**

Rachel Donahue is a doctoral student at the University of Maryland's iSchool, researching the preservation of complex, interactive digital objects and encouraging the creators of those objects to become more involved in the process. She received a BA in English and Illustration from Juniata College in 2004, and an MLS with a specialization in archives from University of Maryland in 2009. Rachel is a Research Assistant at the Maryland Institute for Technology, currently supporting the NDIIPP funded Preserving Virtual Worlds and the Mellon Foundation funded Computer Forensics and Born-Digital Content in Cultural Heritage Collections projects. She is currently in the process of planning a series of symposiums between archivists, videogame developers, and game scholars to build interest and infrastructure for the preservation of objects (both physical and digital) created during game development. Additionally, she supports the preservation, implementation and communications activities of the National Archives and Records Administration's Electronic Records Archives program. Rachel's first taste of the internet was accessing Usenet through a VT100 terminal and TIN, quickly followed by MUDs and IRC, and a solid addiction to social networking sites. She started playing video games with Sesame Street and a keyboard overlay for the Commodore 64 and hasn't stopped since.

- **John LeGloahec**

John LeGloahec joined the National Archives and Records Administration (NARA) in June 2006 as an Archives Specialist in the Electronic and Special Media Records Services Division. Prior to joining NARA, John worked at the International Monetary Fund Archives and the Rockefeller Archive Center, where he was Supervisor of the Nelson A. Rockefeller Papers Project. He holds a Masters in Library Science (MLS) from the University at Albany and a Masters degree in Social Studies Education (MS) from Long Island University.

John is very active professionally. As a member of the Society of American Archivists (SAA), John has served on the Program Committee (2001) and co-chaired the Host Committee for the 2006 Joint Meeting, held in Washington DC. He has also served as a Meetings Assistant for SAA at several SAA Annual Meetings. He recently concluded his tenure as Treasurer of the Mid-Atlantic Regional Archives Conference (MARAC), a position he held since 2002. John has also presented at both SAA and MARAC meetings several times since joining the profession.

- **Lynda Schmitz Fuhrig**

Lynda joined the Smithsonian Institution Archives (SIA) in August 2005 to work on the Collaborative Electronic Records Project (CERP). This three-year pilot between SIA and the Rockefeller Archive Center resulted in tools and processes for the long-term preservation of email accounts. She has co-instructed two workshops on this work. As SIA Electronic Records Division archivist, she participates in various digital curation and preservation issues and digitization projects. She previously served as editorial library director at two media organizations, where she was responsible for physical and digital assets. Lynda has a Master's degree in History from the University of Illinois-Springfield and a Bachelor's degree in Print Communications from Bradley University in Peoria, Ill.

- **Bethany Panozzo**

Beth is a Program Specialist at the National Archives and Records Administration in College Park, MD in the Office of Modern Records Programs. She is a member of the Electronic Records Management (ERM) Policy Team that develops guidance for Federal agencies to help them comply with records management laws and regulations. She is also the administrator of the Toolkit for Managing Electronic Records (http://toolkit.archives.gov) and is the new Membership Coordinator for the National Archives Assembly. She is a recent graduate of School of Information at the University of Michigan where she specialized in Archives and Records Management. During graduate school, she worked at the Inter-university Consortium for Political and Social Research (ICPSR) and the Gerald R. Ford Presidential Library and served on the board for the SAA Student Chapter.

- **Benjamin Goldman**

Ben Goldman is the Digital Programs Archivist at the American Heritage Center (AHC) in Wyoming, where we’re currently in the process of building a program for managing and preserving electronic records. I’m a mere five months into my archives career, having come from graduate library school at Syracuse University, and several years in IT and web development before that. I’ve been eager to join the electronic records community early in my career – to learn as much as I can about what others are doing, but also, hopefully, to contribute to the section through the work I’m doing at the AHC.
